

# CNC Machining

# Made to Your Specifications

Fibox offers a comprehensive range of enclosure customization services, backed by years of experience and expertise. We can deliver cost-effective solutions for even the most demanding packaging requirements.

All Fibox enclosures can be customized to your exact specifications. Our state-of-the-art CNC machinery makes light work of intricate details like holes, cutouts, and recesses. Enclosures can be painted, printed with your branding, and equipped with functional accessories. The result? A fully assembled, ready-to-use unit - straight from the box.

Our dedicated East Coast service center houses a team of application engineers, CAD specialists, and CAM programmers. We utilize advanced CNC technology specifically designed for precise plastic machining.

Many packaging solutions benefit from Fibox's wide selection of accessories, enhancing the functionality and usability of your enclosure system.

We even offer assembly services and pre-installed accessories, delivering a truly seamless experience.
