

INSTRUMENT PROTECTION WINDOW

- UL listed NEMA 4X rated
- Low profile continuous hinge
- Overlapping cover for strength & increased gasket protection
- Large viewing area transparent covers
- Multiple locking options
- Opaque & transparent covers
- Robotically laid dual PUR gasket
- Bolt-on installation

The IPW provides an easy-to-install, secure HMI access point to any enclosure or flat surface with its high ingress and impact protection (IP66 and IK09) and NEMA 4X ratings.

With a secure low profile, continuous hinge design and sleek integrated quarter turn locks, the IPW minimizes access to where security and safety are needed.

The IPW (Instrument Protection Window) is a UL-listed, NEMA 4X rated HMI cover. The IPW can be mounted on any manufacturer's enclosure to provide safe and secure access to underlying components and instruments. Instrument Protection Windows are available with opaque or transparent covers and various locking options.

Once locked, the dual Formed-In-Place polyurethane gasketing maintains a dry, dust-free environment.

Order Code		Locking Mechanism				Cover
Order Prefix	Dimensions (in)	Screw Cover	Bit Lock	Wing Knob	Key Lock	Transparent
